

Y5 Curriculum Summary

Arithmetic	Reasoning
<p style="text-align: center;">Number & Place Value</p> <ol style="list-style-type: none"> Count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000 Count forwards and backwards with positive and negative whole numbers, including through zero <p style="text-align: center;">Addition & Subtraction</p> <ol style="list-style-type: none"> Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction) Add and subtract numbers mentally with increasingly large numbers <p style="text-align: center;">Multiplication & Division</p> <ol style="list-style-type: none"> Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers Multiply and divide numbers mentally drawing upon known facts Divide numbers up to 4 digits by a one-digit number using the formal written method of short division. Progress to decimal remainders. Multiply and divide whole numbers and those involving decimals by 1, 10, 100 and 1000 Solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign <p style="text-align: center;">Fractions including Decimals</p> <ol style="list-style-type: none"> Add and subtract fractions with the same denominator and denominators that are multiples of the same number Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams 	<p style="text-align: center;">Number & Place Value</p> <ol style="list-style-type: none"> Read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit including a comma between Hundreds of Thousands, Thousands and Hundreds e.g. 4,239,435 Round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000 Interpret negative numbers in context Solve number problems and practical problems that involve all of the above Read Roman numerals to 1000 (M) and recognise years written in Roman numerals. <p style="text-align: center;">Addition & Subtraction</p> <ol style="list-style-type: none"> Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why. <p style="text-align: center;">Multiplication & Division</p> <ol style="list-style-type: none"> Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers Establish whether a number up to 100 is prime and recall prime numbers up to 19 Recognise and use square numbers and cube numbers, and the notation for squared (²) and cubed (³) Solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates. <p style="text-align: center;">Fractions including Decimals</p> <ol style="list-style-type: none"> Compare and order fractions whose denominators are all multiples of the same number Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths Recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number [for example, $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5}$] Read and write decimal numbers as fractions [for example, $0.71 = \frac{71}{100}$] Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents Round decimals with two decimal places to the nearest whole number and to one decimal place Read, write, order and compare numbers with up to three decimal places

Measurement

1. Measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres
2. Calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (cm²) and square metres (m²)

8. Solve problems involving number up to three decimal places

Percentage including Decimals

1. Recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred' and that 'one whole is equal to 100%'
2. Write percentages as a fraction with denominator 100, and as a decimal e.g. 15% = $\frac{15}{100}$ = 0.15
3. Solve problems which require knowing percentage and decimal equivalents of $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{2}{5}$, $\frac{4}{5}$ and those fractions with a denominator of a multiple of 10 or 25.

Measurement

1. Convert between different units of metric measure (for example, kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)
2. Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints
3. Estimate the area of irregular shapes
4. Estimate volume [for example, using 1 cm³ blocks to build cuboids (including cubes)] and capacity [for example, using water]
5. Use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling

Time

1. Solve problems involving converting between units of time

Properties of Shape

1. Identify 3-D shapes, including cubes and other cuboids, from 2-D representations
2. Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles
3. Draw given angles, and measure them in degrees (o)
4. Identify: angles at a point and one whole turn (total 360o) angles at a point on a straight line and 21 a turn (total 180o) other multiples of 90o
5. Use the properties of rectangles to deduce related facts and find missing lengths and angles
6. Distinguish between regular and irregular polygons based on reasoning about equal sides and angles

Position & Direction

1. Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.

Statistics

1. Solve comparison, sum and difference problems using information presented in a line graph
2. Complete, read and interpret information in tables, including timetables.
